

Mathematics Intermediate Phase
Richard Marumani
28 August 2020

Greetings colleagues. I hope you are all safe and strong. Let us encourage our Grade 9 teachers to prepare worksheets on algebraic expressions for learners which they will use at home. This is a fundamental topic which needs to be taught and mastered in depth. Focus should be on factorisation of algebraic expressions. Continue to request parents and guardians to support their children in order to cover more work in the time available. Always remind them to refer to the NECT website link www.nect.org.za/materials/Maths/grade9 to access materials.
