

The topic whole numbers is being done this week in Grade 4. Learners are multiplying 2x2 digit numbers. Encourage teachers to develop more worksheets with a variety of practice activities including 2 by 1 digits as well, to cover 3 easy 4 medium and 3 difficult on this topic (3-4-3 model of assessment). Multiplication involves a combination of skills that need constant and regular practice for deeper mastery. They should reinforce the use of the multiplication table to aid them in their multiplication.

Provide the teachers the link www.nect.org.za/materials/Maths/grade6 to access resource materials for reference.
