

Dear Parent /Guardian

One of the benefits of the current lockdown is the opportunity for Learners to learn from home. Science is a diverse and practical subject which learners can benefit from even in the home.

The Activity for this week is to:

- Read** about/visit a specific wetland in your vicinity
- Write** a brief report on the importance of wetlands including:
 - habitats and biodiversity
 - water quality

-**Discuss** the benefits of a wetland.

If possible, take time to visit a nearby wetland together with the learner.

We hope that you will find this activity interesting.

“Change is inevitable. Growth is optional”

Thank you

Justine
