

Mathematics Teaching Methodologies during Covid19 period

Covid19 disease requires teachers and parents to implement new teaching methods and ways of supporting learners. Groupwork and textbook sharing should now be discouraged, while the following methods should now be encouraged. Teachers should practice making videos for their classes, answering students' emails and messages as well as having online hours to speak with their students. Teachers should communicate regularly and show availability to their learners. Create sense of community through WhatsApp groups, Zoom or MS Teams platforms. Assign work that matters by sticking to specifics to cover syllabus. Encourage learners and parents to watch Woza Matrics programme on <https://wozamatrics.co.za>
