

**Dear Parent /Guardian**

Science is a diverse and practical subject which learner can benefit from even in the home set up.

The Activity for this week is to:

- allow learners to complete this table on rating and ranking electrical appliances on consumption
- to check for consumption learners will have to look for the wattage of an appliance – the higher the wattage the higher the consumption
- allow learners to use as many appliances as possible

Appliance	Consumption	Use	Ranking
Television			

According to William Temple, the most influential of all educational factors is the conversation in a child’s home.

Thank you. Have a wonderful week

Justine
