

REFLECTION AND PLANNING

I take this opportunity to thank every FET Mathematics team member for a job well done. Your efforts were not in vain and will soon be reflected in the results. It is imperative that we now take time to reflect and plan for year ahead. Reflection is important hence 3 mirrors on a car. Left mirror may represent the resources (classrooms, boards, books, tablets, trimmed ATPs etc) we used, right mirror the methodologies (routines, groupwork, online teaching etc) and the inside mirror talking to ourselves (preparations, attitudes, attendance, marking etc). We will keep these in check as we move ahead shielded by the windscreen, our vision. Enjoy your Christmas!
