

Greetings to you colleagues. I am Richard, NECT Mathematics curriculum coordinator. Our topic for this week is Data Handling.

Idea 1: Data Handling

- Make the topic **more practical** for the learners
- Allow different **strategies** from learners
- Section on data **organising & representation** (tallies/graphs) must be done thoroughly
- Identify **common misconceptions** and intervene on the spot
- Use correct **Mathematical terminology** at all times
- Refer to **sequential teaching table** during lesson preparation
- Always refer to policy document on the **content specifications and clarification**
