

Mathematics Intermediate Phase

Richard Marumani

14 August 2020

I hope all is well. As schools are reopening let us encourage our parents to prepare learners for the academic terms ahead. Focus for the week is preparing learners on Whole numbers. Fundamental Skills to be inculcated include comparing and ordering, rounding off, addition and subtraction. They can use any Mathematics resources at home which deal with identified concepts and skills.

Parents should set goals with their children and show that effort and discipline is required to succeed. Provide the teachers the link www.nect.org.za/materials/Maths/grade6 to access materials.
