

POSITIVE LEARNING ENVIRONMENT

Positivity is a key component the creation of positive learning environment. Interacting with students in a positive manner, exhibiting positive behaviours, and maintaining a positive attitude is one of the most important steps for establishing a positive learning environment.

Positive learning environment is key to students' academic, emotional and social success in schools. Unfortunately, it does not just happen on its own—it must be created. It offers a climate of safety, where risk-taking is encouraged, there is open authentic conversation, trust and respect are fostered, and positive interaction is the norm. It is about creating an environment that is inviting and appealing, so that students are pleasantly engaged in their learning and teachers share their enjoyment of the learning process. Both teachers and students should try to create as safe, pleasant and stimulating atmosphere as possible so that learning is enjoyable and effective.

Key features of positive learning environment

1. Every learner feels accepted and respected.
2. Learning is through play and exploration
3. Independent learning and autonomy are fostered.
4. Opportunities for children to learn indoors and outdoors are provided.
5. Children feel emotionally and physically safe.
6. Children have a voice.
7. A holistic approach to learning is promoted.
