

To: FET Mathematics SAs, Parents, Teachers & learners

Topic: We will soar like eagles

Message Objective(s):

1. To improve FET Mathematics pass rates
2. To enable learners to build self confidence in writing their final examination

I would like to commend you for the efforts made to this far. You fought hard and well done! Exams are now on, and this calls for us to be more disciplined than ever. Keep focused on your studies and you will make it.

Join study groups, do lots of practice and ask teachers or online Woza Matrics tutors for clearing any misconceptions met during your studies. Balance your study time and rest time as well. Give yourself time to relax and refresh the mind.

Make sure you have all the equipment for the exam on the exam day. Be early to the venue to avoid missing necessary instructions. Start with the questions of which you are sure. Be good at time management, a 20 marks question is worth doing within 20 minutes and not more so avoid taking too much time on low scoring question. Believe in yourself and you will make it. Remember, teachers, parents and friends are backing you so you are not alone.

You will make it. This is your year, go for the fight and win the battle.

Good luck!

From: Itai Makuyana
