

My Mathematics Pal

The Mathematics journey should not be travelled alone. We need pals (friends) to take us through and lean on during challenging times. Besides whatsapp groups and teachers, we do have other technological platforms that we can utilise. Some of these platforms include Matric 2021 Study Guides, Mindset, Paper mate, Matric Go, Microsoft Maths Solver and Photomaths. These applications are downloadable on our phones and are user friendly. They do complement learning and support materials downloadable from NECT website www.nect.org.za. Download a Maths application like Photomaths today and have your problems solved step by step. My Maths app, my problem solver!
