

PRACTICE MAKES PEPECT

Life is a problem solving process! Mathematics prepares us for life's eventualities. During this time of Covid-19 we can make use NECT resource packs. These packs include some worked examples and past exam questions which both learners and teachers can easily utilise. I would also like to bring to your attention the use of Telegram app which has some advantages over whatsapp. The Telegram platform allows one to download materials up to 2gigs in the form of videos or documents and accommodates more contacts. I urge teachers and learners to download resource packs from our website and start practising.
