

Dear
Mathematics
Teacher

The NECT in consultation with the DBE's Curriculum Team developed the Term 4 Planner and Tracker aligned to the Recovery ATPs for Grade 4 to 9 Mathematics. The Planner and Trackers are available per grade on the NECT zero rated website (www.nect.org.za).

The Planner and Tracker provides guidance on (a) starting with catch-up, re-teaching and remediation, (b) sequencing content to be taught, (c) covering the essential and necessary mathematical skills to be developed, (d) reflecting on essential mathematical skills for each topic and (e) challenging fast learners with non-routine problems.
