

To: FET Mathematics SAs, Parents, Teachers & learners

Topic: Winter School: Taking advantages of opportunities

Message Objective(s):

1. To improve pass rates at FET Mathematics
2. To enable teachers, parents, and learners to prepare themselves for final-year examinations.

The goals and targets were set. It is school holidays yes, but for our candidates is business as usual. It is time for winter school.

What is good about winter school? It enables us to do revision of all learnt topics and concepts in a very favourable environment. In most cases the students and teachers from different schools converge at one school and camp there. Winter school enhances the studying spirit by creating a learning and studying culture.

The time allows both teachers and students to interact with others from other schools, pull their resources together and teach and learn as a team. It gives the learners the latitude to be exposed to different teaching or learning styles and make a choice of the best or easier method to approach to a question. It enhances social learning.

Take this opportunity to revise as many examination papers as possible. Form study groups and work out problems together. Remember to take a lead in group discussions as well. You can as well consult the Woza matric and Tswelopele tutors through whatsapp on the numbers stated below.

To our Grades 10 and 11, you are encouraged as well to watch the TV programmes. The time to prepare for Grade 12 examinations is now. Remember we need to cover up for time lost during the Covid period. There's a lot that we missed and yet to recover.

We would like to thank the parents and teachers for roles in affording us this learning opportunities. Our efforts in our studies will never be in vain. We will celebrate at the end of the year. Remember, it is better to suffer to enjoy than to enjoy to suffer. Our efforts now will give us bright future where we will all enjoy.

Wishing you all the best in your winter school studies!

From: Itai Makuyana
