## Activity 1

1 Look at the pictures of early clocks. Draw a line to match the picture of the clock to the description.
Shadow stick clock
A stick is placed in the ground. The
length of the shadow changes as the
sun moves across the sky. Time is
measured by the shadow as it moves
on the ground.
Water clock
Water drips at a constant rate from
one container to another through a
small hole. The water level shows how
many hours have passed since the
bucket was filled. Time is measured
in hours.
Sundial
The clock has a flat, round plate with
a pointer that makes a shadow. As the
Sun moves across the sky, the shadow
moves across the numbers, showing
the time.
